Electrical Value: £120,000

Southend University Hospital Fire Alarm Infrastructure Replacement

Bower Fuller were employed directly by the Hospital Trust on this project which involved installing a new fully addressable fire detection panel network throughout the hospital.

The works required close liaison with hospital medical staff to ensure minimal disruption to patients, visitors, staff and clinical activities. Some areas also had noise restrictions.

In order to satisfy all the demands of these working restrictions a combination of extreme out of hours working and accelerated means were deployed.

The project was completed, on time and to budget, to the client's complete satisfaction.
